PROFILE

Information technology graduate with hands on experience in network infrastructure, web application security testing and security operations. Supported a live campus network for twelve months, completed a sixteen week security assessment internship and wrote client ready findings reports with remediation advice. Advanced Diploma in Computer Networking, cum laude, with Best Student 2025 and 99 percent in Infrastructure Design. Currently completing a Postgraduate Diploma in Information Technology.

SKILLS

Networking and infrastructure: Cisco routing and switching, TCP/IP, VLANs, DNS, DHCP, Linux administration, Windows Server, Active Directory, Group Policy

Security and testing: Burp Suite, Nmap, Wireshark, OWASP Top 10, web application testing, vulnerability assessment, CVSS reporting

Security operations: Splunk SIEM, detection engineering, MITRE ATT&CK, log and packet analysis, system hardening

Development: Python, FastAPI, Bash, Git, SQL

Communication: technical reports, documentation, first and second line support

EXPERIENCE

Cybersecurity Intern, MWR CyberSec

March 2026 to June 2026

- Conducted structured web application security assessments covering reconnaissance, vulnerability discovery, manual validation and risk analysis, including SQL injection, cross site scripting, broken access control, JWT bypass and file upload flaws.
- Completed a full assessment against a target with no prior knowledge and captured all five flags, ending in remote code execution.
- Wrote a consultant standard report of eleven findings with evidence, CVSS v3.1 ratings, CWE mappings, business impact and remediation advice for technical and non technical readers.

Computer Networking and IT Intern, Oktiq IoT at Motheo TVET College

November 2024 to November 2025

- Gave first and second line support on a live campus network for twelve months, resolving user and infrastructure faults.
- Configured and troubleshot Cisco routers and switches, and administered Linux and Windows systems, Active Directory accounts and Group Policy.
- Monitored network and security logs, analysed packet captures, applied patches and supported network security audits.

PROJECTS

- Blue Team Splunk SOC Lab:** built and tuned detections for brute force, network reconnaissance and phishing, and mapped each detection to MITRE ATT&CK.
- Qhaphela job scam detection:** contributed to a Python and FastAPI service with a machine learning model that scores job advertisements for recruitment fraud, entered in the UNESCO Youth Hackathon 2026.
- Enterprise network design:** designed a secure, redundant LAN, data centre and VPN architecture for a mid sized organisation, covering addressing, routing and resilience.

COMPETITIONS AND ACHIEVEMENTS

- PAICTA Cybersecurity4D 2025:** first runner up at SADC level, applying practical cybersecurity and problem solving in a regional competition.
- SANReN Cyber Security Challenge 2025:** third place nationally as part of a team solving practical security challenges.
- TryHackMe:** global top 1 percent, built through hands on labs in web security, Linux and networking.
- Best Student 2025, CUT Faculty of Engineering, Built Environment and Information Technology.**

EDUCATION AND CERTIFICATIONS

Postgraduate Diploma in Information Technology, NQF 8

2026 to present

Central University of Technology, distance learning. Modules include Ethical Hacking and Operating System Programming.

Advanced Diploma in Computer Networking, NQF 7, cum laude

Completed 2025

Central University of Technology. Average 80.9 percent: Infrastructure Design 99, Computer Server's Administration 90, Information Security 84.

Diploma in Computer Networking, NQF 6, cum laude

2022 to 2024

Central University of Technology. Average 76.8 percent.

Cisco Network Security 2024, NDG Linux Essentials 2024, MWR CyberSec Virtual Internship 2026. CompTIA Security+ in progress, not yet certified.
